

NHS Health Check: Gloucestershire key trends

What is the NHS Health Check?

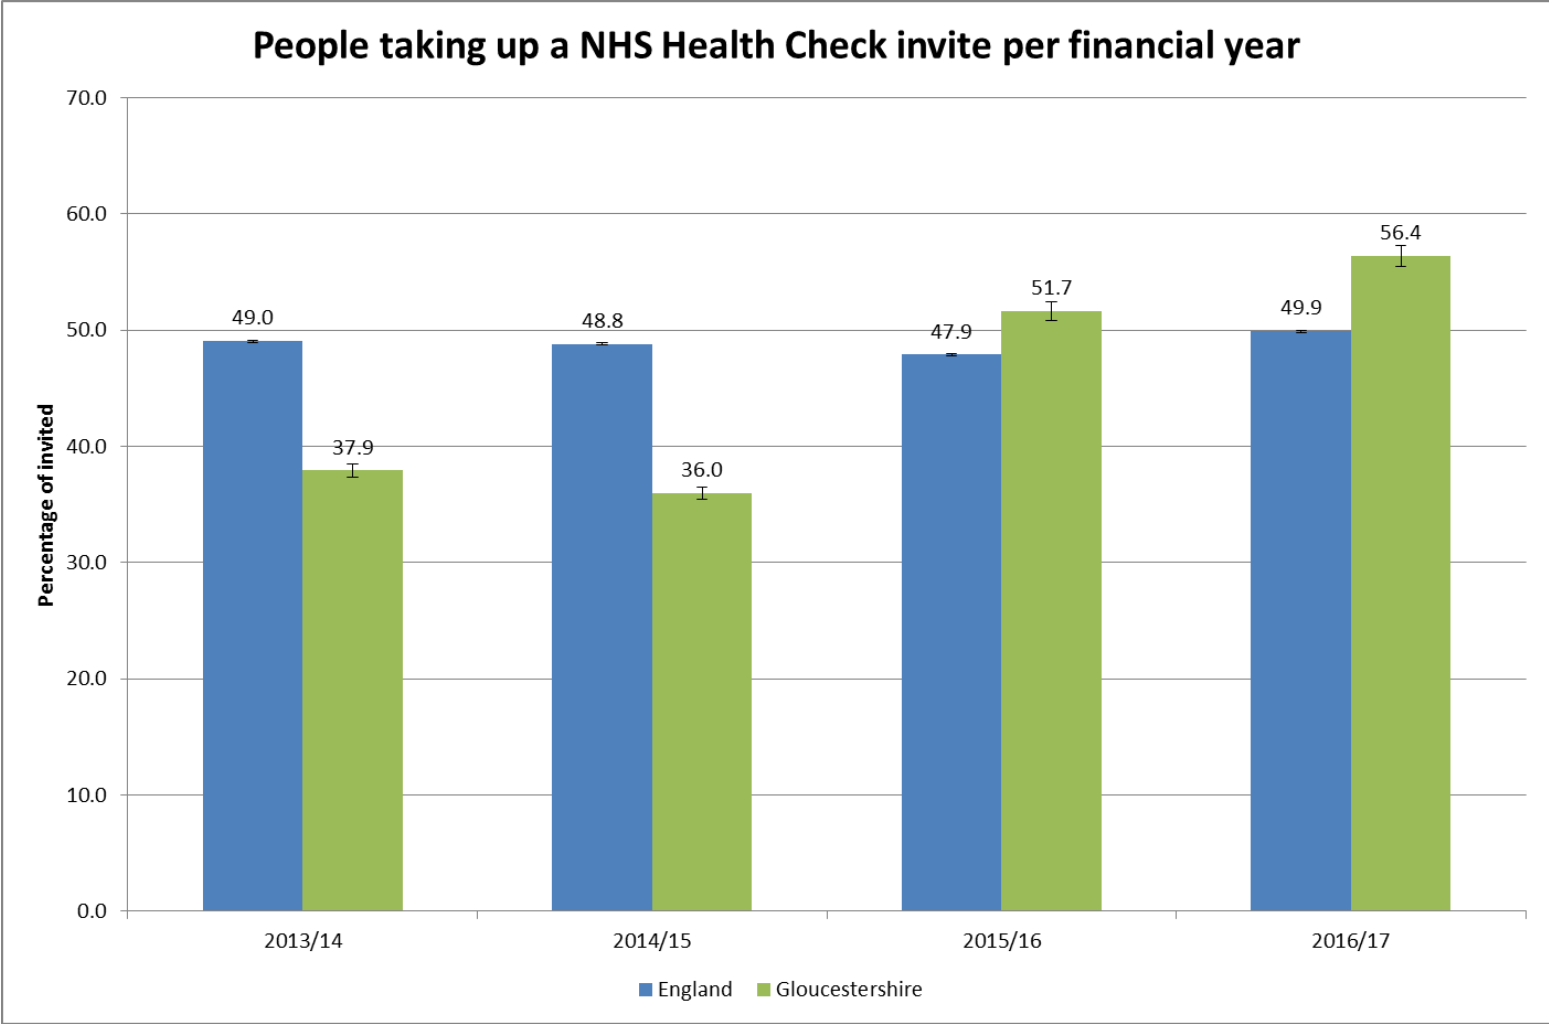

The NHS Health Check programme aims to help prevent heart disease, stroke, diabetes, kidney disease and certain types of dementia. Everyone between the ages of 40 and 74, who has not already been diagnosed with one of these conditions or have certain risk factors, will be invited (once every five years) to have a check to assess their risk of heart disease, stroke, kidney disease and diabetes and will be given support and advice to help them reduce or manage that risk.

- ❖ In 2017/18 a significantly lower percentage of eligible people had been invited to a NHS Health Check in Gloucestershire than the England average, the national target is 20%. The percentage has been on a downwards trend since 2015/16.
- ❖ The percentage of invited people taking up NHS Health Checks is better than the England average.
- ❖ A significantly lower percentage of eligible people have received a NHS Health Check in Gloucestershire than the England average since 2013/14. Although the percentage has been following the England trend it is still below the England average.
- ❖ The cumulative percentage of people invited to a NHS Health Check over 5 years is above the England average.
- ❖ The cumulative percentage of people taking up the NHS Health Check over 5 years both of those eligible and those invited are below the England averages.
